

Where are we in the astrological long cycles?

Can astrology guide us for the next 5-10yrs?

Stan Dynak (AstroInsights.ca) &
Alahnaa Campbell (YourLifePlan.ca)

1

What REAL astrology has to say about our current times?

- There is a lot of misinformation out there, which plays into fears, and leads to fear-based responses
- There is also a lot of ungrounded information and advice out there, that leads people to ignore their truth, and just keep thinking their experience is because of the times we are in
- Both lead to inappropriate action, or inappropriate inaction

2

The reason Alahnaa works with Stan

- He told me at a show “A gift will come to your door, but you need to be willing to let it in”, this guided and shifted the way I looked at opportunities that came my way, and greatly changed the outcome of my life and my business
- Now we move onto “mundane” astrology (for the collective/world as a whole, instead of personal, natal, transit, progression, unique individual astrology), while also considering our unique perspective and gifts

3

Course Structure:

- The first class will show OUR unique difference in how we may view things
 - WE being:
 - the astrology experts, who’s perspective Stan will present to you (Bill Herbst, Michael R. Meyer, and Dane Rudhyar) over the next two classes
 - myself and Stan, and
 - each of our live students
 - This will allow us to see the different lens, through which we each see current events, our perceived role, responsibility, and possible outcomes that we may see, for our shared mundane astrology
 - Continued on the next slide...

4

Course Structure:

- The first class continued...
 - I.e., Do we have a strong association with Pluto, Neptune, and/or Uranus in our natal astrology? Is it a stressful or easy relationship? Do we carry generational markings? What is our age, in terms of our ability to be optimistic or to feel too tired to take on too much, and to worry? What have we witnessed (trauma and hope stored in our cellular memory), based on where and how we grew up? Are we in the mainstream workforce? Do we have kids under 12, over 12, over 18, over 22, etc, in or out of the school system? Do we have likeminded support/friends/family? Do we feel the need to comply in order to “pay the bills” or “live the life we want”, (is there money pressure, or a lack of confidence)?
 - Continued on the next slides...

14

How does this fit in the BIG picture...

- The people in charge (the elite, the establishment, the rich, the people who run the world) don't want things to change. They have been dealing very well with the astrological shifts, in the past 40-50yrs. They don't want natural social change (evolution and mastery), because that makes it harder for them to maintain control. None of us were meant to be controlled. This is why they ridicule astrology, because they use it themselves, against the common people, and always have.
- *Also see Barbara Hand Clow's opinion, which goes even further back, and address whether there really are limited natural resources, a line of thinking that leads to a fight for survival, instead of trusting the earth, as a place we can play, evolve, and create*

15

Perspectives on \$\$

- You are hands down, the richest person in the world, how much money will it take for you to feel secure?
- More
- Founder of Esoteric Medicine: "I'm glad I don't have a lot of money, because then I would have to spend all my time worrying about my money, and I wouldn't be able to develop my understanding of life, and be of service to others with my work."

Bill Herbst Astrologer

Personal Sessions
I offer two astrological services to my clients. They are related but slightly different.

For all my clients in the U.S. and the majority of my international clients, I offer what I call **Sessions**. Sessions are live, two-way conversations via telephone. Clients share their circumstances and concerns, and I bring my astrological experience and expertise through the tools of natal charts and major transits. Together, we co-create the content of the session.

For clients in Australia and Pacific Rim countries, I offer what I call **Readings**. Readings are non-interactive. No phone call, no conversations. Clients share their questions and concerns with me in writing via email before I do the reading, then I record my interpretation of their charts and major transits.

Sessions are interactive, and the content is shaped in part by what clients share in the conversations, while readings are more "pam" as astrological interpretations. Both sessions and readings are recorded as mp3 files, which clients then download from a private page on this site.

Individual sessions are the main work I've done throughout

WORLD CHANGES AND THE OUTER PLANETS

1960 – 2020 (Intro)

Some slides based on the writings of Bill Herbst,
Michael R. Meyer and Dane Rudhyar

18

PLANETARY CYCLES and their meanings ("Astrology 101")

JUPITER and SATURN – two gas giants, outermost planets for our ancient ancestors, the edge of reality for Greeks and Romans.
URANUS, NEPTUNE, PLUTO – recently discovered, 3 outermost modern planets, wild cards of collective transformation, also considered to be the Galactic Emissaries or Cosmic Messengers.

*Before we discovered them, Uranus, Neptune, and Pluto were part of humanity's collective unconscious. Now that we've found them, they're intruding into the conscious dimension of our lives. And yet, they are still beyond the ordinary levels of human awareness, will, and intention. For lack of a better word, **they are transformative**. At some point in our future evolution (should humanity survive long enough), we might come to understand how to harness or use these motivational energies. For now, however, they remain wild-cards, like jokers in the deck. We understand some about them, but not much. In essence, we are like children playing with matches, fascinated by the powers they bring, but as likely to burn down the house as create something wonderful with them. And the one thing that is painfully obvious about the three outer planets is that **they are quite beyond our command**. Oh, we employ them, but **we don't control the outcomes of how we use them**. We try, of course, but we're a long way from understanding how to use these energies without unforeseen consequences, unintended repercussions, and major blowback. [Bill Herbst on Neptune and Pluto in America, June 2021]*

Planets individual cycles (length of time it takes for the planet to return to exact same spot in the sky)
JUPITER – 12 years (planet of expansion, wisdom, principles, opportunities, benefits)
SATURN – 29 years (planet of responsibility, maturity, authority, physical reality)

Trans-Saturnians (3 outermost planets operating beyond Saturn's orbit)

URANUS – **84 years** (sudden, unpredictable changes, shock, upheaval, revolutions)

NEPTUNE – 165 years (illusion, fantasy, lies, deception, idealism, transcendence)

PLUTO ~ 245 years (confrontations, power struggles, deep fears, dominance, destruction, renewal, regeneration)

19

Extremely long cycles spanning centuries

Affecting human evolution and cultural cycles

1. Neptune-Pluto (491-493 years long)
2. Uranus-Neptune (170-172 years long)
3. Uranus-Pluto (between 113 and 142 years long)

Long-term cycles, all between 30 and 50 years

Operating within their respective century

Affecting our physical reality, economy, politics

1. Saturn-Pluto (harshest of all 3)
2. Saturn-Uranus (revolutionary)
3. Saturn-Neptune (visionary, transcendent)
4. Four cycles involving Jupiter (between 13 and 20 years)

CYCLES OF PLANETARY PAIRS

NEPTUNE-PLUTO cycle around **493** years long – Empowering our collective dreams and visions

Last conjunction 1891-92 in Gemini, currently in an extremely long waxing sextile aspect (60 degrees apart)

URANUS-NEPTUNE cycle **170-172** years long – Combination of scientific breakthroughs and society's visions

Last conjunction 1991-93 in Capricorn

URANUS-PLUTO cycle around **140** years long – Breakthroughs, revolutions, struggles for power and domination

Last conjunction 1965-66 in Virgo, currently past its opening square which happened between 2012-2015.

Cycles of trans-Saturnians – evolutionary background, "hidden" changes that are happening below the surface

20

SATURN-URANUS cycle 45 years long – breakthroughs, changes and revolutions affecting our physical reality and social structures, **last conjunction 1987-89** in Sag & Capricorn, currently in the last/closing square aspect.

SATURN-NEPTUNE between 35-36 years long

SATURN-PLUTO between 31-38 years long

JUPITER-SATURN 20 years long, last conjunction in Aquarius (Dec 2020) in AIR element.

URANUS breaks down the existing reality and structure through sudden shocks and disruptions.

NEPTUNE dissolves and transcends our reality through the world of fantasy, illusion and deception.

PLUTO destroys the old forms and prepares the ground for a renewal and regeneration.

SUMMARY & CONCLUSIONS

Outer planets change their sign positions/locations according to their speeds and individual cycle lengths.

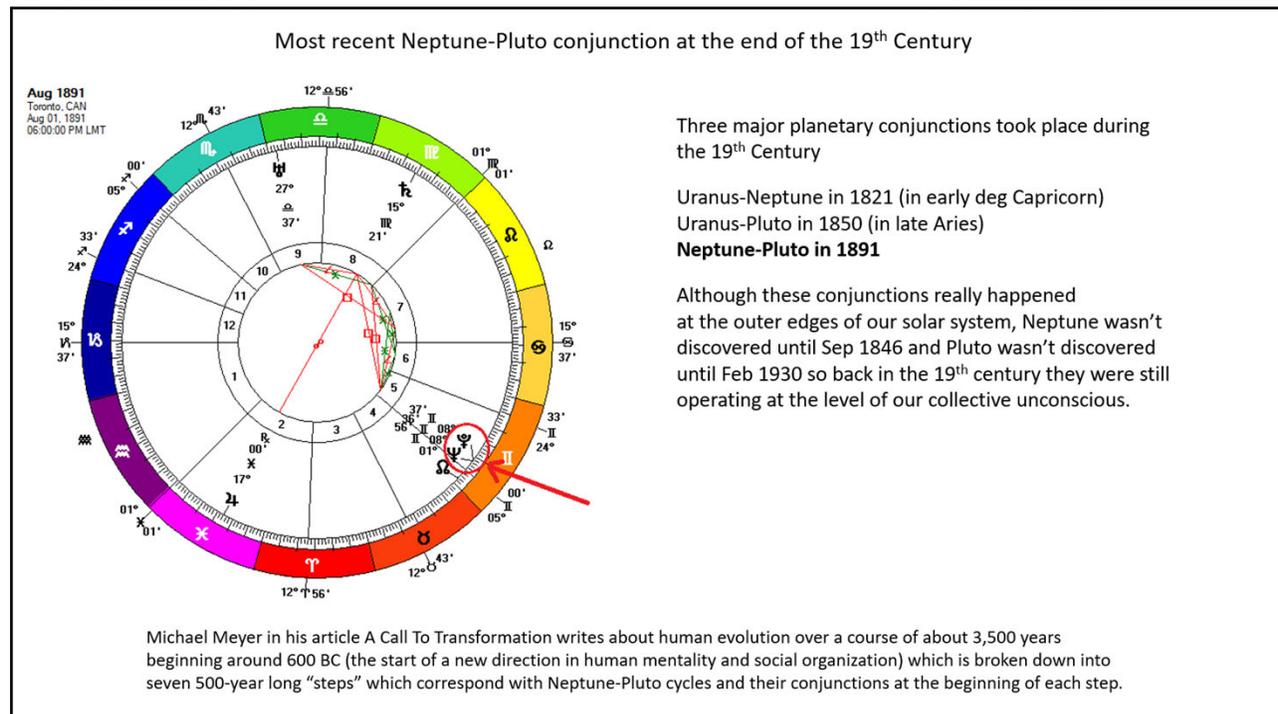

Uranus, Neptune and Pluto changing signs is always considered a big event with long-term influences lasting for up to 7-8 years (Uranus) or for at least a couple of decades for Neptune and Pluto.

Jupiter changes sign every 12 months. Saturn every 2 and a half years. These changes are more frequent but still significant.

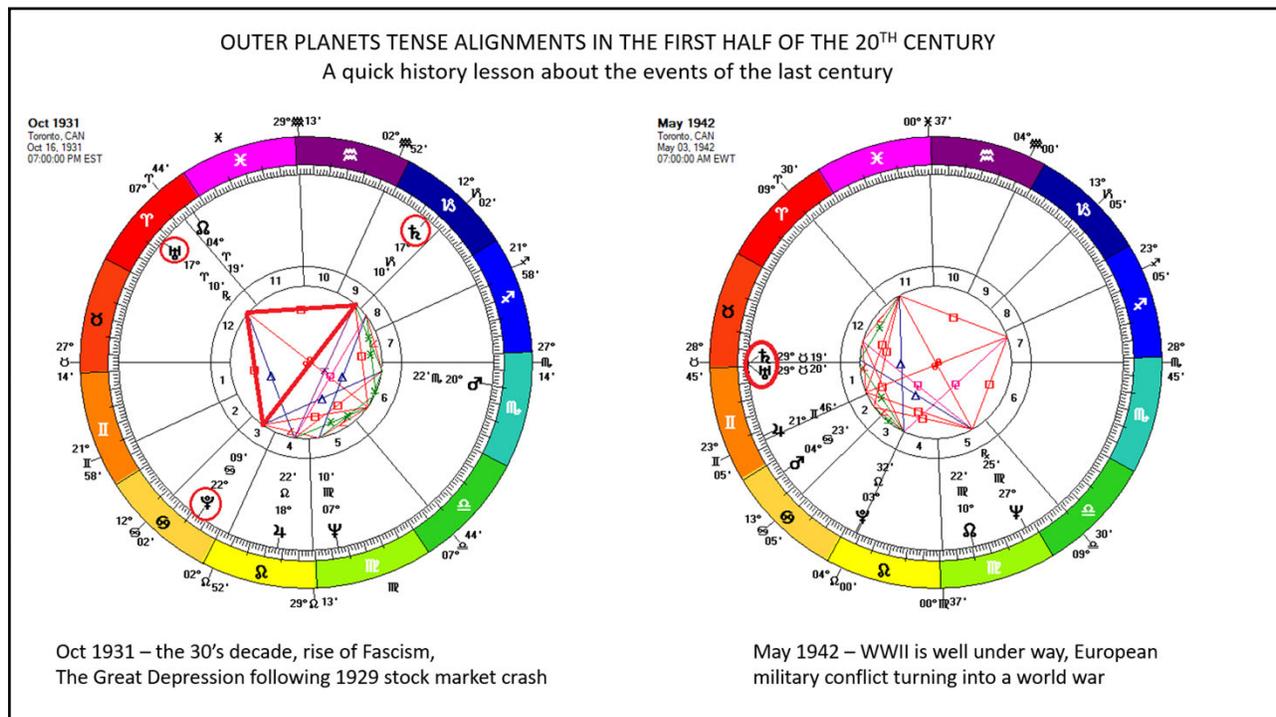

Jupiter and Saturn in signs can point to the general direction for the growth and development of our culture, society and economy. Should be considered and interpreted along with the current Jupiter-Saturn cycle aspect.

Very long and extremely long cycles between planetary pairs (Uranus-Pluto, Saturn-Uranus, etc.) carry a much bigger impact and can introduce potentially deeper, sweeping changes to the world of politics, economy and social structures around the times of their conjunctions, squares and oppositions.
